

Name: Kunchala Naga Chaitanya Sphoorthy

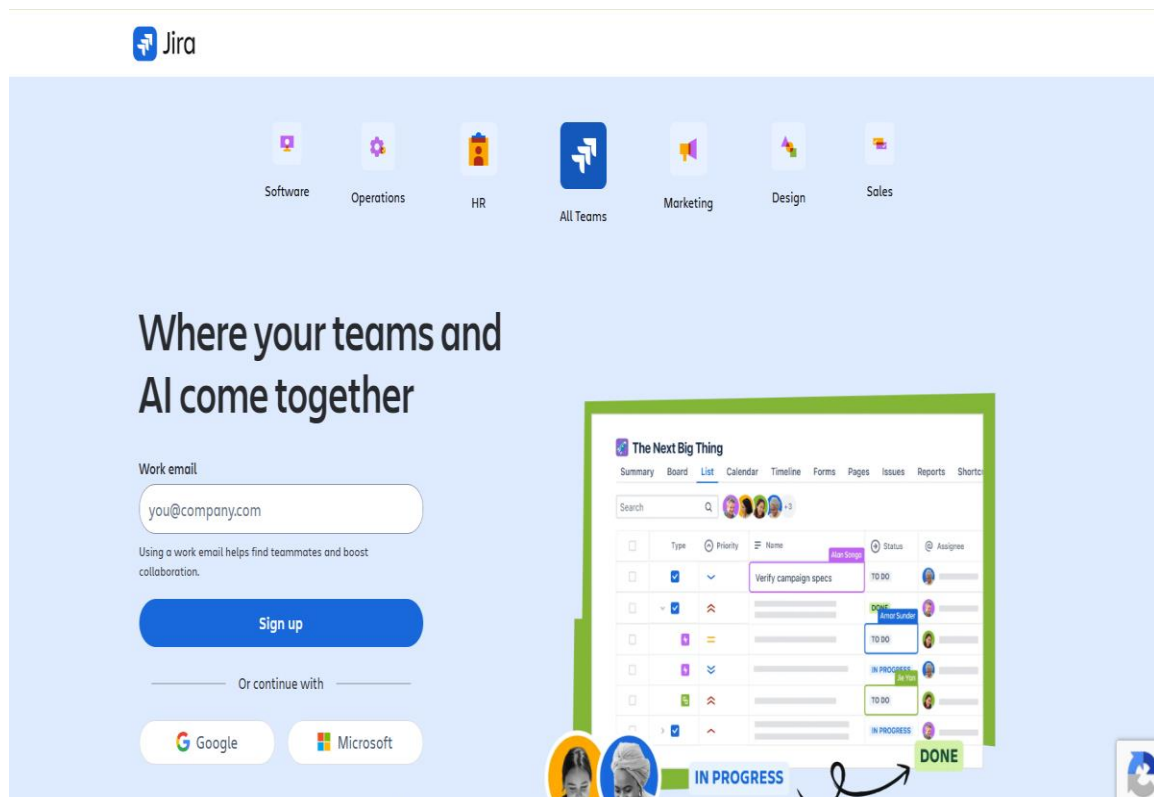

Roll Number: 2420030510

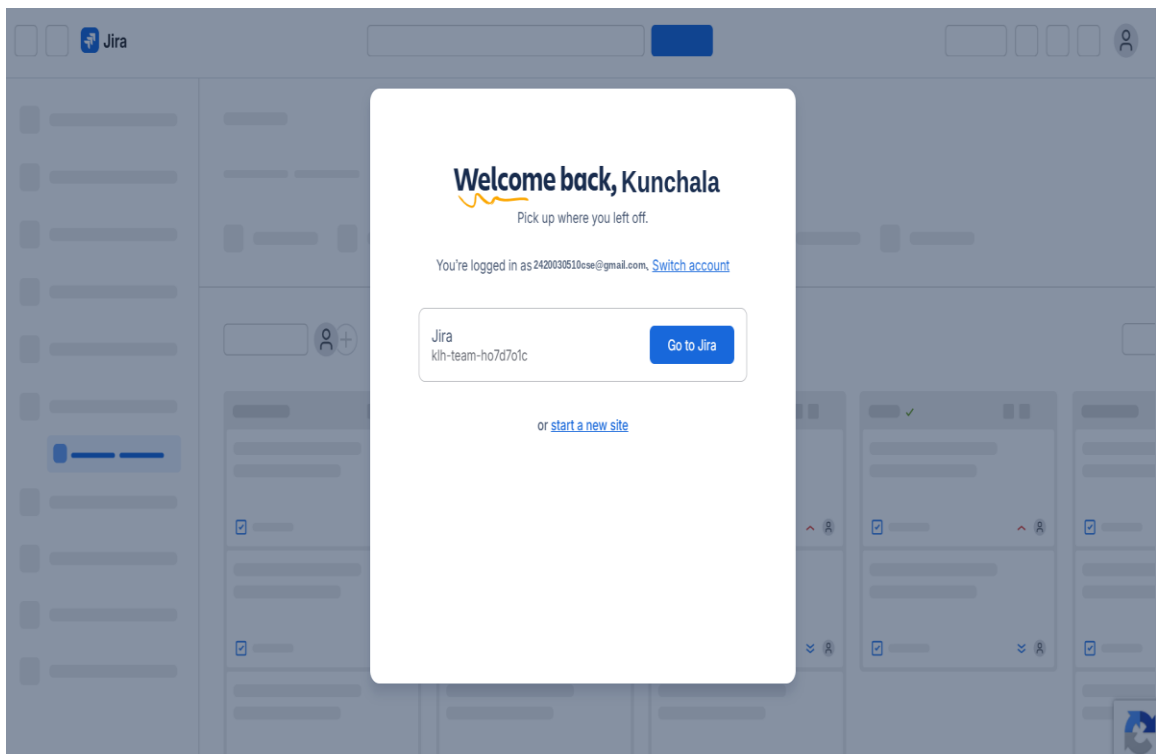

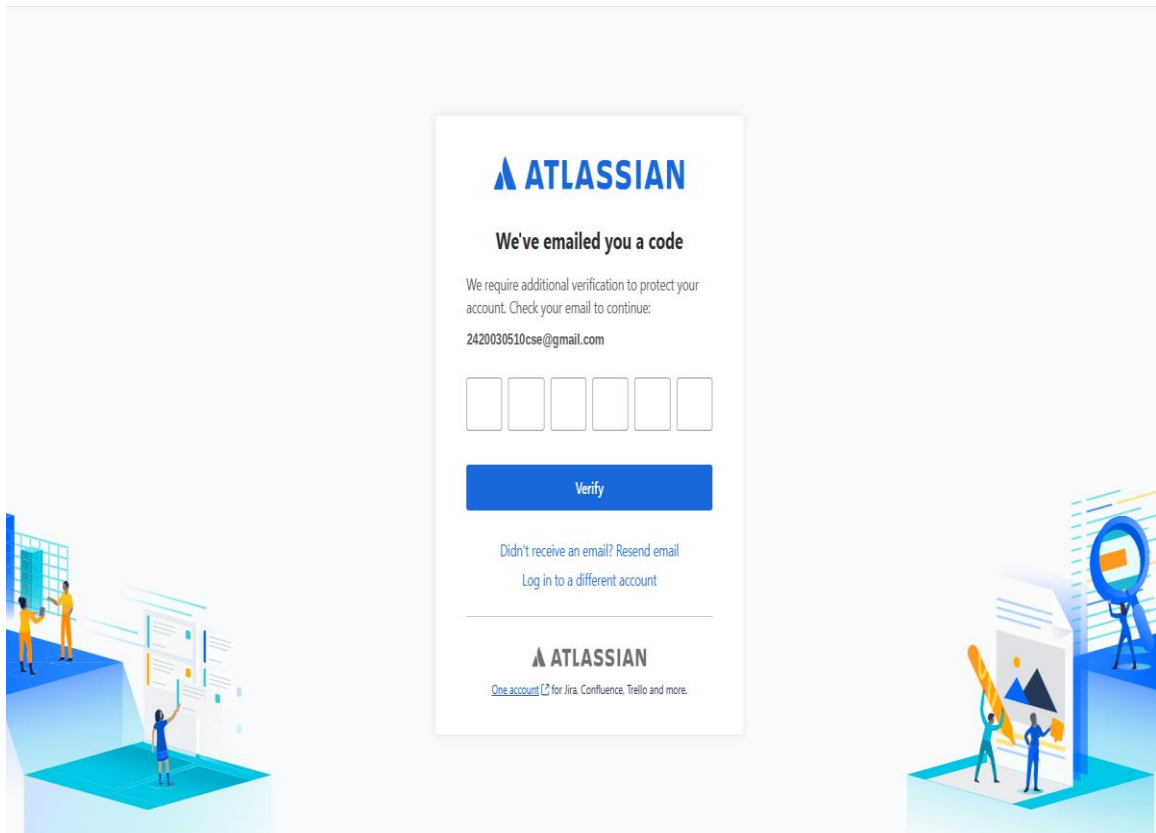

Task 3: Jira Board Setup, User Stories and Story Points

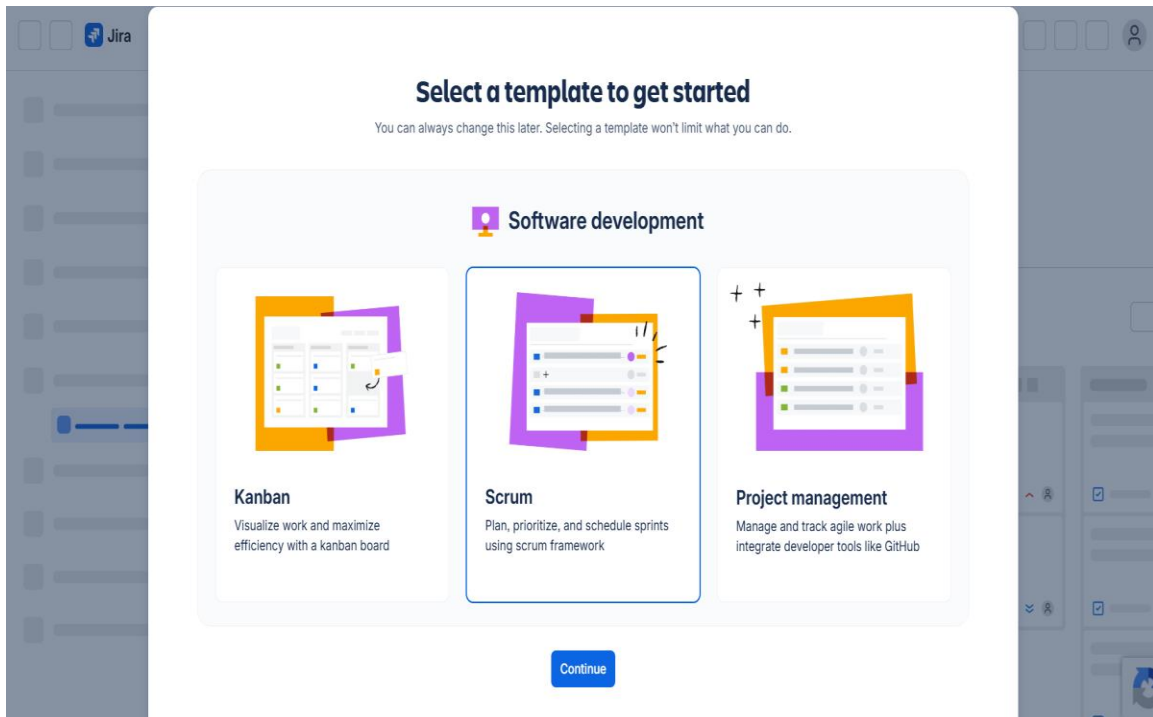

Aim: To create a Scrum project in Jira, define five user stories, assign story points, create a sprint, and manage work using a Scrum Board.

Step 1: Create a Jira Account

1. Go to <https://www.atlassian.com/software/jira>
2. Click **Get it Free** or **Sign Up**.
3. Create an Atlassian account and verify your email.(Domain Mail Id Only)
4. Log in to Jira.

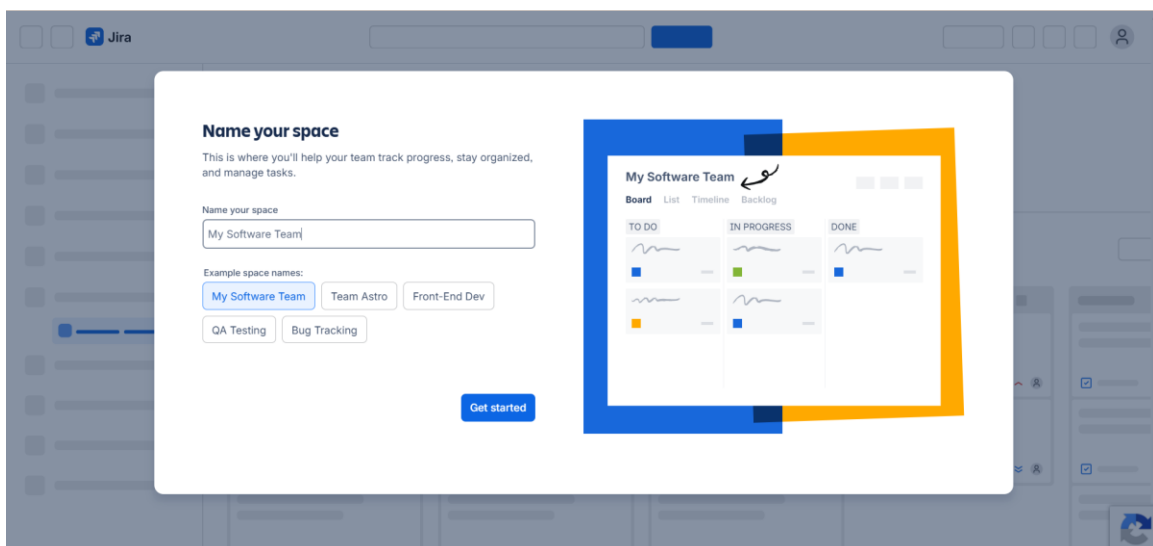

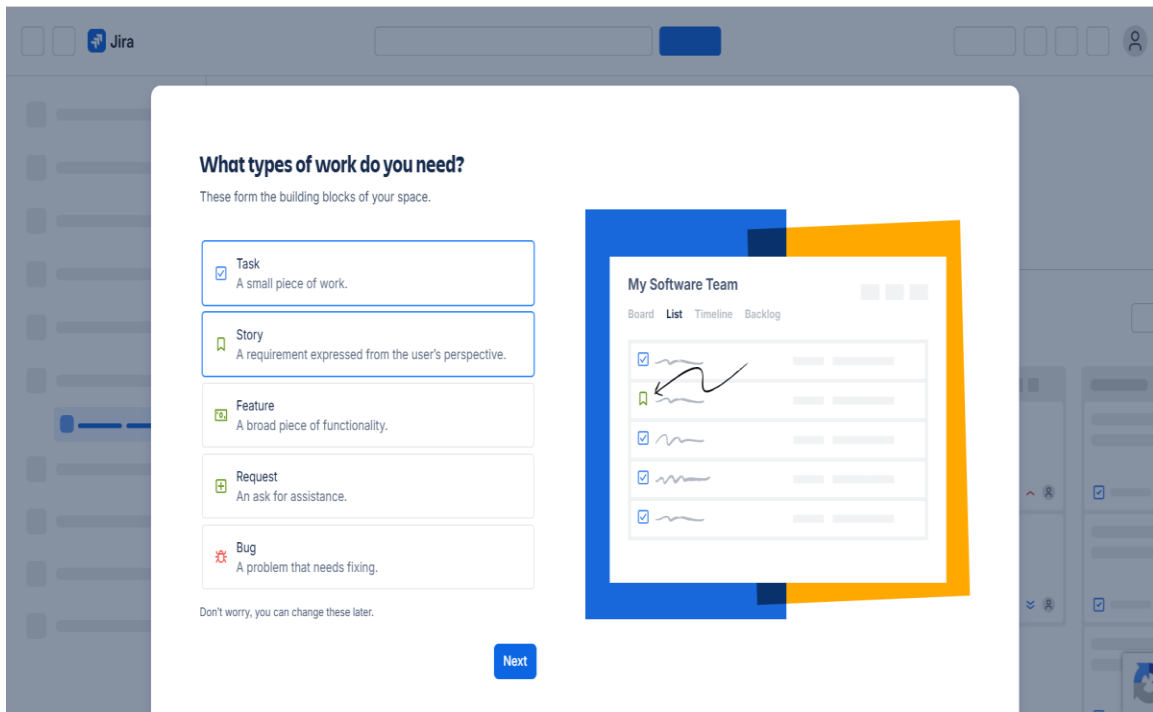

Step 2: Create a Scrum Project

Create a Software project using the Scrum template. Give the project a name such as 'My Software Team'.

Step 3: Select Work Types

Select Story and Task as work types. Stories represent user requirements.

What types of work do you need?
These form the building blocks of your space.

☒ **Task**
A small piece of work.

☒ **Story**
A requirement expressed from the user's perspective.

☐ **Feature**
A broad piece of functionality.

☐ **Request**
An ask for assistance.

☐ **Bug**
A problem that needs fixing.

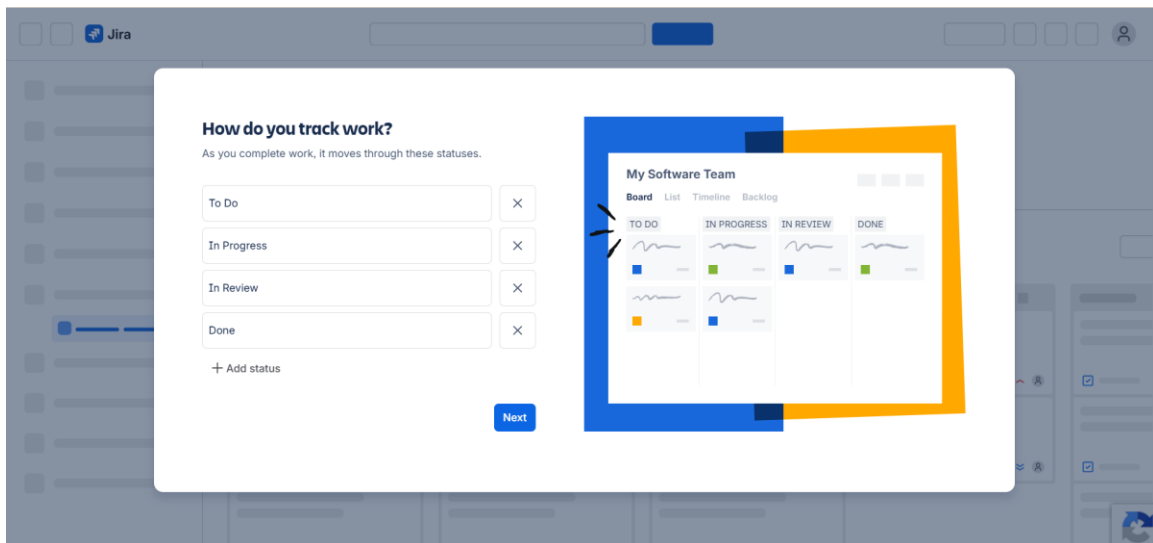

Don't worry, you can change these later.

Next

The screenshot shows a Jira setup window with a list of work types. 'Task' and 'Story' are selected with checkboxes. To the right, a preview of a Jira board titled 'My Software Team' is shown, featuring a list view with several items, one of which is highlighted with a yellow box and a black arrow.

Step 4: Configure Workflow

Keep the default workflow: To Do → In Progress → In Review → Done.

How do you track work?
As you complete work, it moves through these statuses.

To Do

In Progress

In Review

Done

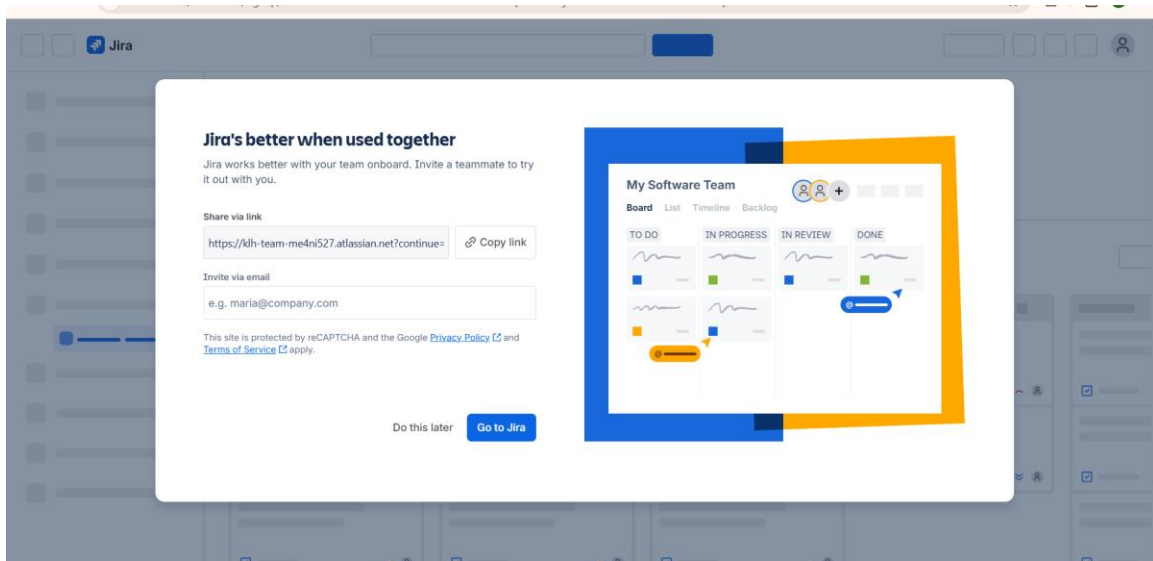

+ Add status

Next

The screenshot shows a Jira setup window for configuring the workflow. On the left, there are four input fields for the workflow stages: 'To Do', 'In Progress', 'In Review', and 'Done', each with a delete 'X' button. Below these is a '+ Add status' button. On the right, a preview of a Jira board titled 'My Software Team' is shown, displaying a Kanban board with four columns: 'TO DO', 'IN PROGRESS', 'IN REVIEW', and 'DONE'. Each column contains several items represented by colored squares and wavy lines. A black arrow points to the 'TO DO' column in the preview.

Step 5: Skip Team Invitation

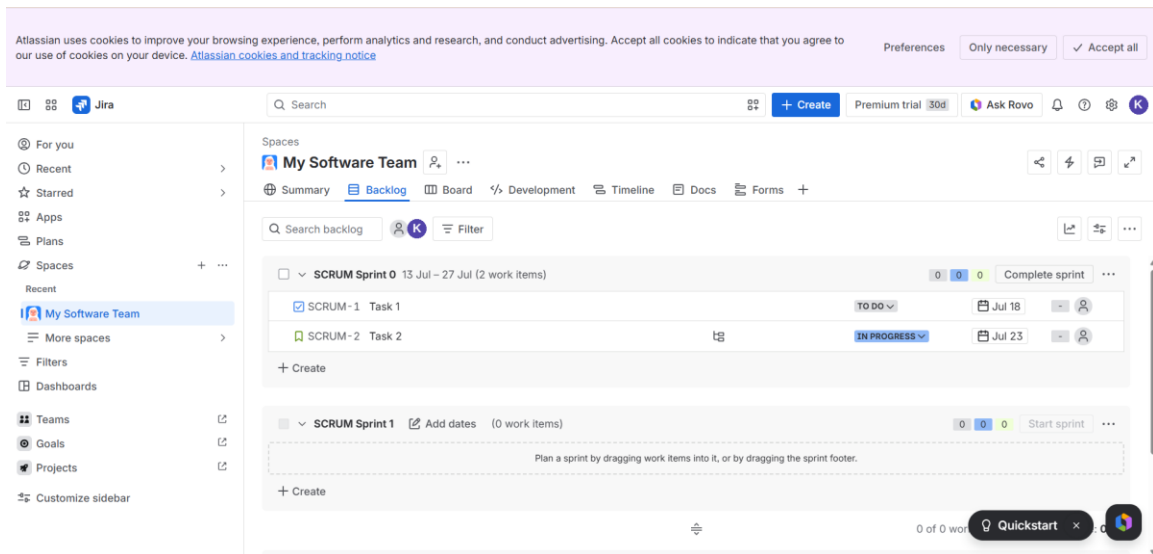

Skip inviting teammates and proceed to Jira.

Step 6: Create User Stories

Create five stories:

- Student Login
- Course Registration
- View Attendance
- Faculty Enter Marks
- View Results

Step 7: Assign Story Points

Assign story points using Fibonacci estimates:

Student Login-3

Course Registration-5

View Attendance-2

Faculty Enter Marks-5

View Results-3

After clicking "Go to Jira"

You should see your project dashboard.

Go to Backlog

From the left navigation menu, click **Backlog**.

Create User Stories

Click **Create** (top menu or in the backlog).

Story 1

Summary*

Student Login

Description

As a Astudent,
I want to log in securely,
So that I can access my academic information.

Status

- To Do (leave as it is)

Story Point Estimate

3

Priority

- Medium (leave as default)

Reporter

- Leave as default

Click **Create**.

Create the remaining four stories

Story 2

Summary: Course Registration

Description:

As a student,
I want to register for courses,
So that I can enroll in my subjects.

Story Points: 5

Story 3

Summary: View Attendance

Description:

As a student,
I want to view my attendance,
So that I can monitor my academic progress.

Story Points: 2

Story 4

Summary: Faculty Enter Marks

Description:

As a faculty member,
I want to enter student marks,
So that students can view their academic performance.

Story Points: 5

Story 5

Summary: View Results

Description:

As a student,
I want to view my examination results,
So that I can evaluate my performance.

Story Points: 3

Click **Create**.

Repeat for these stories:

Summary	Story Points
Student Login	3
Course Registration	5
View Attendance	2
Faculty Enter Marks	5
View Results	3

Step 3: Assign Story Points

Open each story and set the corresponding Story Points.

Step 4: Create Sprint

- Click **Create Sprint**
- Drag all five stories into **Sprint 1**
- Click **Start Sprint#**

Required fields are marked with an asterisk *

Space*My Software Team (SCRUM)

Work type*StoryStatus*TO DO

Summary*

Description

Type /ai to Ask Rovo or @ to mention and notify someone.

Create anotherCreate

Those fields are optional except the ones marked with *****. For this lab, you can fill them as follows.

Field	What to Select
Assignee	Assign to me (or leave Automatic)
Parent	Leave blank
Sprint	Leave blank for now (you'll add it after creating the sprint)
Priority	Medium (default)
Labels	Leave blank (optional)
Due Date	Leave blank
Team	Leave blank
Start Date	Leave blank
Story Point Estimate	Enter 3 (for Student Login)
Reporter	Leave as Kunchala
Attachment	Not required
Linked Work Items	Leave blank
Flagged	No 

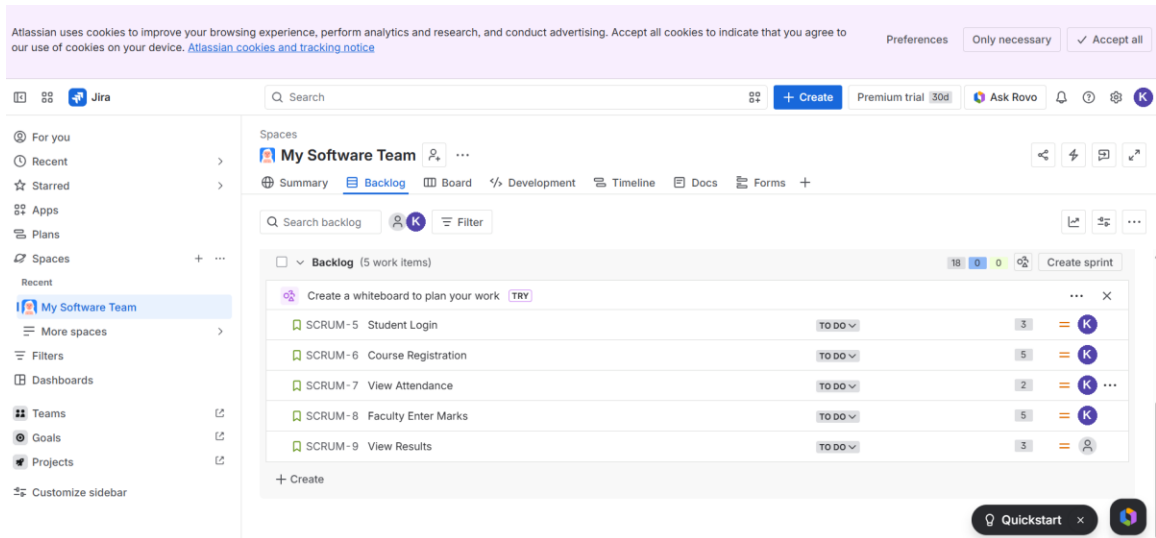

Step 8: Verify Product Backlog

Ensure all five stories appear in the backlog.

Step 9: Create Sprint

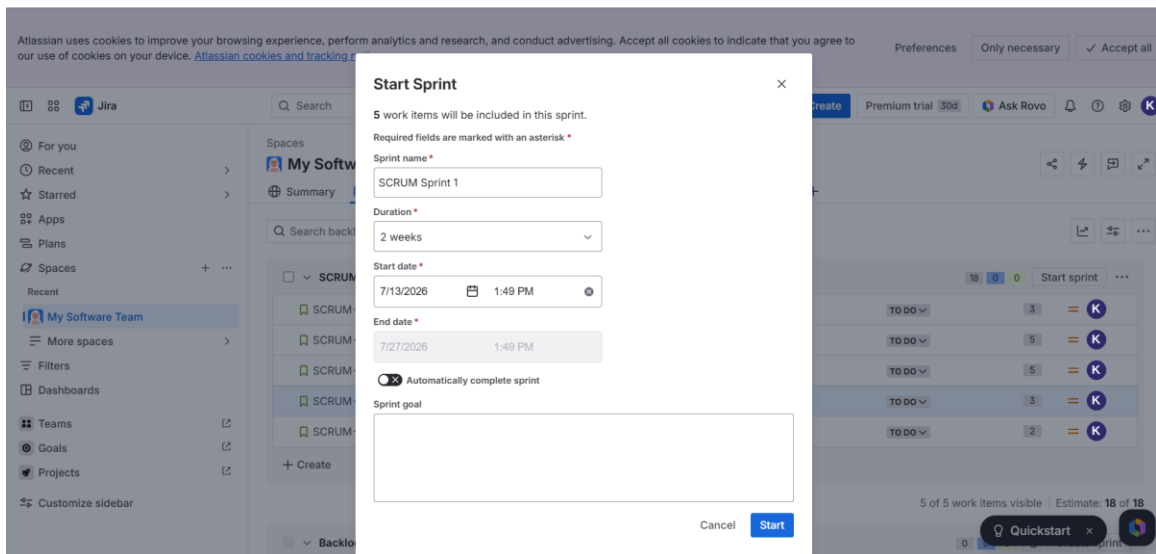

Create SCRUM Sprint 1 and move all stories into the sprint.

Sprint Goal: Implement student login, course registration, attendance viewing, faculty marks entry, and result viewing.

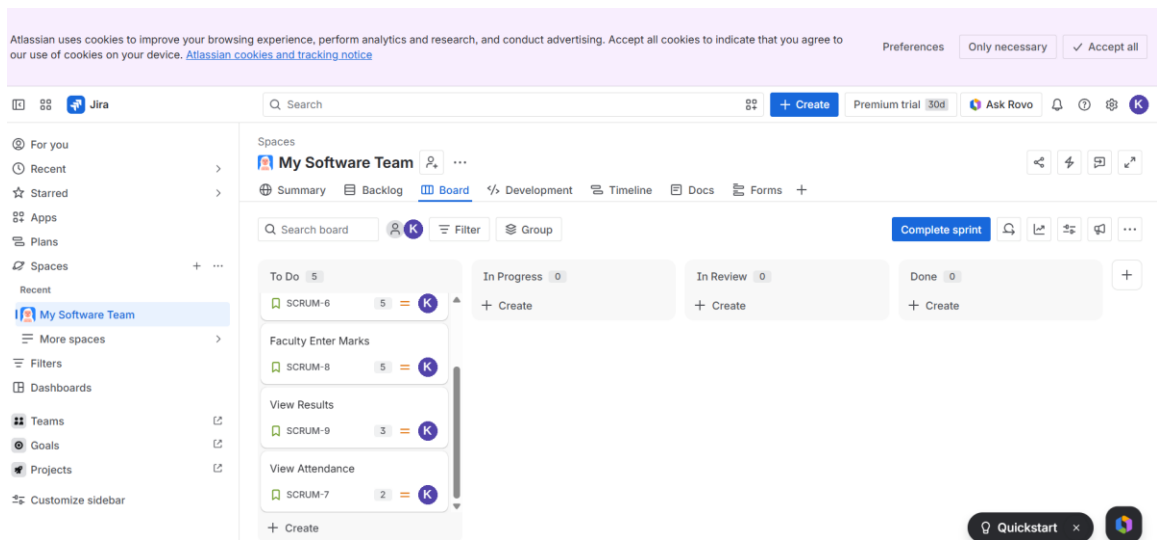

Step 10: Start Sprint

Start Sprint 1 with the default duration.

Step 11: Scrum Board

Verify that all five stories are displayed in the To Do column on the Scrum Board.

Result

Successfully created a Jira Scrum project, defined five user stories, assigned story points, created Sprint 1, and managed the stories using the Scrum Board.
